

# ULTIMATE HARNESS

We putted a lot of effort into creating a versatile harness useable for different styles of racing. Because of that you can tune your Ultimate harness into three different setups.

The first setup is the 'Ultimate Long Distance' setup. This setup provides Ultimate back support and therefore less strain on the lower back and less muscle fatigue in the abdominals. In combination with the soft 3D- Thermo moulded internal of the harness, you are provided with superb comfort.

'Ultimate Long Distance' setup: Webbing order= A-B-C

The second setup is the 'Ultimate competition' setup. This setup provides you with the best freedom of movement-support ratio ever seen on a harness.

'Ultimate competition' setup: Webbing order= A-C

The third setup is the 'Ultimate regular' setup. This is the standard setup and it is a combination of the two other setups. With this setup you end up with the best all-round harness for all sorts of conditions. From big seas on your cat to hard choppy conditions in your dinghy.

'Ultimate regular' setup: Webbing order= A-B-A-C

3 different setups

3D thermo moulded

4 internal back support

Pre shaped kevlar seat section

Motion neoprene legstraps

Safety Spreader
