

Nacra 570

Nacra 570: Off the beach and shallow water sailing at its best!

The 570 combine's simplicity and ease of sailing with the modern look that Nacra made famous. The 570 is sloop rigged with a boomless mainsail concept, boardless symmetrical hulls and beachable kick-up rudder system. The 570 has a front beam jib sheeting position which provides an uncluttered trampoline. The 570 has taken advantage of Nacra features such as length, width, trampoline and boomless sailplan to make it one of the largest boardless catamarans in production today. Roomy and simple set up with performance thrown in just for the fun of it!

This Cat is ideal to sail with two persons for racing and with even more for cruising!

Details

Length:	5.65m
Beam (width):	2.44m
Mast Length:	9.15m
Weight:	163kg
